

Emergency Action Plan Call-Out Exercise 2023

Summary:

On March 20, 2023 at the Amston Lake clubhouse a call-out review was performed on the Amston Lake Emergency Action Plan (EAP) for the Main Dam.

Attendance:

1. Frank Hoisl, Amston Lake District (ALD) President, primary District point of contact with regards to EAP activity
2. Jim DeLisle, ALD resident

Both of these individuals are responsible for monitoring activities, decision-making, and coordinating and implementing emergency repairs at the dam.

Call-Out Exercise:

The ALD will verify that all persons and telephone numbers on the *Early Warning* and *Final Warning Notification Charts* are current. In addition to verifying personnel and contact information, the ALD will verify that each contact can locate their copy of the EAP and that they understand their roles and responsibilities in the event of an emergency, as described in the EAP.

The ALD will contact the locally available resources provided in the EAP to verify contact information and ensure that the services are current.

The ALD will review the most recent dam inspection report, any significant development or construction activity downstream of the dam, and any modifications to the dam or spillway. The EAP must be updated to reflect any significant changes to the dam or downstream area and any changes in personnel or contact information.

During the review Frank and Jim walked through the latest version of the EAP, dated August 2017 (revised April 2021). Both understand their responsibilities.

Frank verified contact information with Base Construction, per appendix "A."

Frank contacted the Town of Hebron Emergency Management Authority, Emergency Management Director Paul Bancroft. He was informed that Paul has a new contact phone number and Frank will update the EAP. Frank will also update his contact list with the latest number.

Paul requested an electronic copy of the EAP and Frank provided.

No significant changes to the dam or downstream area were identified. The riprap along the main dam was added to.

Respectfully submitted,

Frank Hoisl, President
Amston Lake District
